**Subject:** Chapter 8 Conclusions  
**Attachments:** Conclusions for chapter 8- revised JF - revised tm -JLF 3-21-14.doc

Tom and Dave,

Attached are my responses to the modifications suggested by Tom to the conclusions for chapter 8. The only points remaining, are how to include parallel testing of actives and formulation blanks and the softer wording of HB as a surrogate for nonApis species. I can certainly live with the modified wording for the HB and nonApis in the suggested final version, but the parallel testing needs to be mentioned here rather than in the recommendations for further research as I see it. A suggestion is made.

As we discussed, all co-authors should be given one work week to agree in principle to the final version with no word changes, but only suggestions about any topic not included, or emphasized wrongly.

Thanks for all your efforts to bring this to fruition!

Best regards,  
Jim
